

X300 PISTON

The Caliber® X300 is a high performance urethane bonded piston designed for high pressure and high temperature applications. The higher durometer chemistry of this piston enables the piston to make a consistent and reliable seal in extreme conditions and temperatures up to 280°F eliminating the threat of extrusion. Longer piston life equates to longer liner life, greatly reducing downtime and operating costs associated with mud pump expendables.

BENEFITS

- ◆ Designed for oil based and synthetic muds
- ◆ Best in higher temperature applications above 180°F and up to 280°F
- ◆ Best for high pressure applications from 4500 psi to 7500 psi
- ◆ Bonded urethane design for longer life
- ◆ Excellent chemical resistance
- ◆ Flex lip design
- ◆ Forged steel hub
