The Patriot HT Piston is designed to perform in the harshest of drilling conditions. It is compatible with all applications and mud types, and will withstand operating temperatures up to 300 degrees and pressures up to 7500 psi.

Superior design and ultra-durable high temp urethane allow the Patriot HT to outperform all other “extreme condition” mud pump pistons on the market. If you want to keep your pump performing, don’t settle for the cheap or the familiar - go with a Patriot Piston.

BENEFITS

- Proven, reliable performance in every piston
- Resistant to high pressure, abrasion, heat and extrusion
- Trusted on the largest domestic and international rigs in the world
- Averages 30%+ longer life than other mud pump pistons
- “Bull nose” lip design seals for less ‘squirt’ which reduces flush system contamination
- Superior lip and cut back hub design reduces wear on liner dramatically lowering mud pump operating costs
- Available in a custom wooden box for protection during shipping
- Designed to withstand extreme drilling conditions in all applications
- HT Piston will perform in all types of drilling mud allowing it to be used at any point in the drilling process

*not suited for clear or sea water uses
